

Kewill Clippership®

Save time and money
with Kewill's parcel
shipping solutions 

Software for mission-critical shipping

To satisfy the demands of your domestic and international shipments, you need to be confident that no matter where packages are destined, your shipments will be delivered on time, cost efficiently and with minimal interruption.

Kewill's parcel shipping solutions can help you meet these objectives. Used by thousands of companies every day our solutions automate mission-critical processes for parcel and LTL shipping.

Kewill Clippership the work-horse of the industry

Kewill Clippership is one of the most widely deployed and recognized solutions on the market today. This powerful solution enables organizations to ship with multiple carriers and significantly reduce freight expenditure with features such as rate and service shopping.

Kewill Clippership provides flexible integration to virtually any back office, order management or WMS system enabling users to streamline the fulfillment process, eliminate re-keying errors and provide complete shipment visibility.

Benefits of Kewill Clippership

- Maintain control of shipping operations
- Streamline shipping processes with best practice automation
- Flexibly adjust the shipping mix on the fly by leveraging the lowest cost carriers
- Optimize multi-leg shipments via zone skipping, break bulk and postal induction
- Improve customer satisfaction by providing shipment notifications and visibility
- Provide multiple delivery options to customers with access to all major parcel carriers alongside regional carriers
- Improve productivity by integrating shipping solution with other systems

2,000,000

Our solutions handle the largest parcel shipping volume in the US estimated at over 2 million packages a day

Kewill Clippership Features

- **Multi-Carrier Compliance**

- Full carrier compliance for national and regional carriers including compliance labeling, reporting and electronic manifesting

- **Rate Shopping**

- Get the best rate for every package you ship

- **LTL Rating**

- One system to manage and rate shop across parcel and LTL carriers
- Use CZAR rates, carrier's tariffs or custom rates

- **Reporting**

- Carrier manifest and many other reports come as standard
- Design your own reports, forms and queries to properly monitor shipping activity and analyze costs

- **Batch Tracking**

- Automatically get tracking data for UPS and FedEx shipments
- Allow other departments access to tracking data so they can search shipments using customer name, PO number, tracking number etc

- **Integration with other Applications**

- Kewill's flexible integration allows users to exchange information with virtually any other system and integrate with order processing systems, warehouse management applications or browser-based rating systems
- Streamline your shipping processes by integration with in-line scales and label applications

- **Alternate Rates**

- Calculate and compare alternate rates based on criteria such as negotiated and retail rates
- Store alternate 'retail' rates while manifest maintains actual carrier charges
- Apply sophisticated billing methods such as shipping Next Day Air but billing customer for Ground freight
