

# ConnectSuite

## ConnectSuite e-Certify

Electronic or “e-Certified” mail simply refers to software-based systems that have the ability to upload certified tracking numbers directly to the United States Post Office®. The ConnectSuite e-Certify solution centralizes the processing of certified mail and allows for fast and consolidated document tracking functionality.

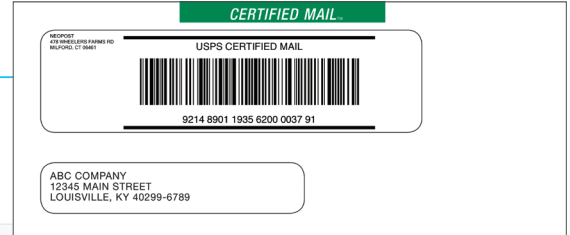

## Questions to Consider Before Sending Important Documents

- Does your business require proof documents have been mailed?
- Does your business require a signature when documents have been delivered?
- Is managing document proof of delivery simply a hassle?

### With ConnectSuite e-Certify You Can:

- Access specific document delivery information, including delivery date and time
- Easily retrieve an image of the recipient's signature that is securely stored in the cloud
- Instantly receive notifications via email of documents that have been delivered using ConnectSuite with OMS-500

If you need the assurance and proof your important documents have been both delivered and received, ConnectSuite e-Certify is for you. e-Certify complements the core USPS® processes OMS-500 facilitates within your print center; including CASS (address verification), PAVE (document presorting), and NCOA (National Change of Address) processing.
